

practical vertebrate zoology pdf

Mammals are the vertebrates within the class Mammalia (/ m ɛˈm eɪ ɪ i ɛ / from Latin mamma "breast"), a clade of endothermic amniotes distinguished from reptiles (including birds) by the possession of a neocortex (a region of the brain), hair, three middle ear bones, and mammary glands. Females of all mammal species nurse their young with milk, secreted from the mammary glands.

Mammal - Wikipedia

The first classification of birds was developed by Francis Willughby and John Ray in their 1676 volume *Ornithologiae*. Carl Linnaeus modified that work in 1758 to devise the taxonomic classification system currently in use. Birds are categorised as the biological class Aves in Linnaean taxonomy. Phylogenetic taxonomy places Aves in the dinosaur clade Theropoda.
