MULTIPLE SCLEROSIS CAREGIVERS

Research comprises "creative and systematic work undertaken to increase the stock of knowledge, including knowledge of humans, culture and society, and the use of this stock of knowledge to devise new applications." It is used to establish or confirm facts, reaffirm the results of previous work, solve new or existing problems, support theorems, or develop new theories.

Health Policy and Systems Research - WHO

With the growing success of neural networks, there is a corresponding need to be able to explain their decisions – including building confidence about how they will behave in the real-world, detecting model bias, and for scientific curiosity.

The Building Blocks of Interpretability - distill.pub

The scientific method is the process by which science is carried out. As in other areas of inquiry, science (through the scientific method) can build on previous knowledge and develop a more sophisticated understanding of its topics of study over time.
