Programming Language Concepts (Undergraduate Topics in

A programming language's surface form is known as its syntax. Most programming languages are purely textual; they use sequences of text including words, numbers, and punctuation, much like written natural languages.

Programming language - Wikipedia

In object-oriented programming, a destructor (dtor) is a method which is automatically invoked when the object is destroyed. It can happen when its lifetime is bound to scope and the execution leaves the scope, when it is embedded in another object whose lifetime ends, or when it was allocated dynamically and is released explicitly. Its main purpose is to free the resources (memory allocations ...

Destructor (computer programming) - Wikipedia

A huge list of books about the theory and methods of computing, software development, algorithms, artificial intelligence; computer science monographs
