

DOWNLOAD TEST DRIVEN INFRASTRUCTURE WITH CHEF BRING BEHAVIOR DRIVEN DEVELOPMENT TO INFRASTRUCTURE AS CODE

test driven infrastructure with pdf

Test-driven development (TDD) is a software development process that relies on the repetition of a very short development cycle: requirements are turned into very specific test cases, then the software is improved to pass the new tests, only. This is opposed to software development that allows software to be added that is not proven to meet requirements.

Test-driven development - Wikipedia

Acceptance test-driven development (ATDD) is a development methodology based on communication between the business customers, the developers, and the testers. ATDD encompasses many of the same practices as specification by example, behavior-driven development (BDD), example-driven development (EDD), and support-driven development also called story test-driven development (SDD).
